

Emergency Medical Plan

Lorissa Learning Lab will have a substitute in place in case the provider has an emergency medical condition. The substitute will have all the same qualifications as the providers and will be able to care for the children in the same quality as the providers. The substitute will be introduced to all parents and will have access to the children's files in case of an emergency.

The parents of Lorissa Learning Lab understand and agree that if the provider is out for emergency reasons that the substitute will be working in place of the provider until the provider can return. The parents understand and acknowledge the above procedures during the absence of the provider and have been made aware of them.

In case a child becomes ill there is an isolated space provided in the group day care home for the child so the other children will not become ill. There are enough staff in the group day care home for the ill child to have a staff person for supervision at all times. If the ill child is sick and needs to rest, a cot will be placed away from the rest of the children. If the child gets sick and needs emergency medical attention, 911 will be call and the child will be rush to the nearest hospital, which is Jackson Parkson Hospital, 7531 S. Stony Island Avenue, Chicago, IL 60649, Ph. # (773) 947-7500. And the parent will be called.
